

News topic 10/3/12 MRCA within reach?

Group One, take a look at the Cladograms for Y-67 and you will note #242 is a key node. It will also become one for BOTH group 1 & 2 to tie us together helping extend our histories.

Take a close look at Ron's tree in downloads and try to see where we hook up by comparing your own tree. We need to put in our paternal tree so we all can work together on this and share. Group one needs 903's tree then try 242.

OUR WEB SITE: [www.crwarthen.com](http://www.crwarthen.com) look on the left at the menu or table of contents to find the list of Cladograms and downloads. This web site is for US to build on not just me. For now just email me to get stuff on until I can figure out how to let all of the administrators do it as well. If you sign up you can now post messages. Charlie
